SPRING TRAINING:
FACE, SKIN, BODY

© 2025 Cure Life Magazine

Candice Georgiadis

cure LIFE | Editor-In-Chief

March isn't just about spring flowers and lighter layers—it's the season of sharpening your focus and setting the tone for the months ahead. The air shifts, the light changes, and suddenly, it's not about hiding under coats anymore. It's about showing up—with intention.

This month is full of quiet resets. A time to clean out more than your closet. We're talking skin routines, body goals, and the way you want to carry yourself into warmer weather. Because while everyone else is waiting for summer, you're getting ready now.

At Cure, we're calling it Spring Training: Face, Skin, Body—and we mean business. Whether you're fine-tuning your injectable plan, resurfacing winter skin, or finally starting that body treatment you've been eyeing, March is the moment.
And yes—this season, self-care still counts as productivity.

We've rolled out exclusive launch specials (hello, DiamondGlow™) and smart packages to get you ready without the last-minute scramble. You don't have to rush. You just have to start. Come see what's new, what's next, and what's actually worth your time.

SkinMedica :
HAS ENTERED THE CHAT

Cure is now offering SkinMedica—because science-backed skincare shouldn't feel like a compromise.

Think: recovery serums that play nice with injectables, and topicals that pull their weight between treatments.

Let's cut through it: not all skincare is created equal.

If you've ever spent too much on a "miracle" serum that did absolutely nothing, you already know. SkinMedica is different—and not just because it's backed by the makers of Botox and Juvederm. It's because it's built for real results.

This is medical-grade skincare. That means potent active ingredients (like growth factors, peptides, and retinoids) in formulas that are actually designed to do something—whether you're targeting fine lines, texture, pigment, or post-treatment healing.

New to medical skincare? No problem. You don't need a 7-step routine—just the right products, in the right order, for your skin. SkinMedica plays well with everything from DiamondGlow™ to lasers to injectables, making it ideal for anyone on a treatment plan—or just trying to get serious about results.

Want the best place to start? Ask us about TNS® Advanced+ Serum—a cult-favorite for a reason. Or HA^{5}® for hyaluronic acid that actually hydrates beyond the surface.
Bottom line: If you're investing in your skin, don't let your home routine undo the work. SkinMedica makes sure your results stay results.

DIAMONDGLOW™ VS. "REGULAR FACIALS"

KNOW THE DIFFERENCE

Quick hit: Most facials stop at pampering. DiamondGlow™ starts at clinical depth and doesn't waste a second.

Let's be clear—there's nothing wrong with a classic facial. Steamed towels, light massage, maybe a mask. You leave relaxed, your skin feels "nice," and that's about it. But when you're investing in real skin results, you need more than cucumber water and fluff.

DiamondGlow™.

This is a clinical-grade resurfacing treatment that exfoliates with a diamond-tipped wand while simultaneously extracting debris and infusing targeted SkinMedica® serums deep into the skin. All in one go. No rinsing, no downtime, no "you might see results in a few days." Just visible change—fast.

The three-step process is what makes DiamondGlow™ a standout:

- Exfoliate: Customized diamond tips remove dead skin and smooth texture.
- Extract: Vacuum technology clears clogged pores (yes, you'll see what comes out).
- Infuse: Medical-grade serums are delivered into freshly prepped skin, not just sitting on top.

Regular facials work on the surface. DiamondGlow™ works deeper—into the dermis where change actually happens. That means it's ideal for dullness, fine lines, enlarged pores, acne-prone skin, or anyone who wants a treatment that does something.

Also? DiamondGlow™ isn't one-size-fits-all. Every treatment is tailored to your skin's current condition. Dry and flaky this month? We've got a serum for that. Breaking out next time? We pivot. Your skin is always changing—your treatment should, too.

And while some facials feel like a break from reality, this one feels like a strategy. One that fits perfectly into your larger skincare plan—especially if you're doing injectables, lasers, or just taking your skin seriously this year.

And because DiamondGlow™ at CURE calls for a proper welcome—yes, we're rolling out launch specials worth locking in

💎 DiamondTox Duo – $250
DiamondGlow™ + Botox
Deep cleanse and hydration with DiamondGlow™, followed by wrinkle-smoothing Botox. (Botox charged separately at $10/unit)

💎 Diamond Dew – $799
A Total Skin Hydration Experience
Includes DiamondGlow™ and 2 syringes of Skinvive™—for immediate radiance and deep moisture that lasts up to 6 months. ($250 savings) Skinvive™ is a micro-droplet hyaluronic acid treatment (not a filler) that smooths and brightens skin from within.

💎 Glow Maximizer – $250
Book a DiamondGlow™ and take 30% off any SkinMedica product. Because what you put on your skin after treatment matters most

If you're already investing in your face, your facial should pull its weight.

AGING DOESN'T WAIT —SO WHY SHOULD YOU?

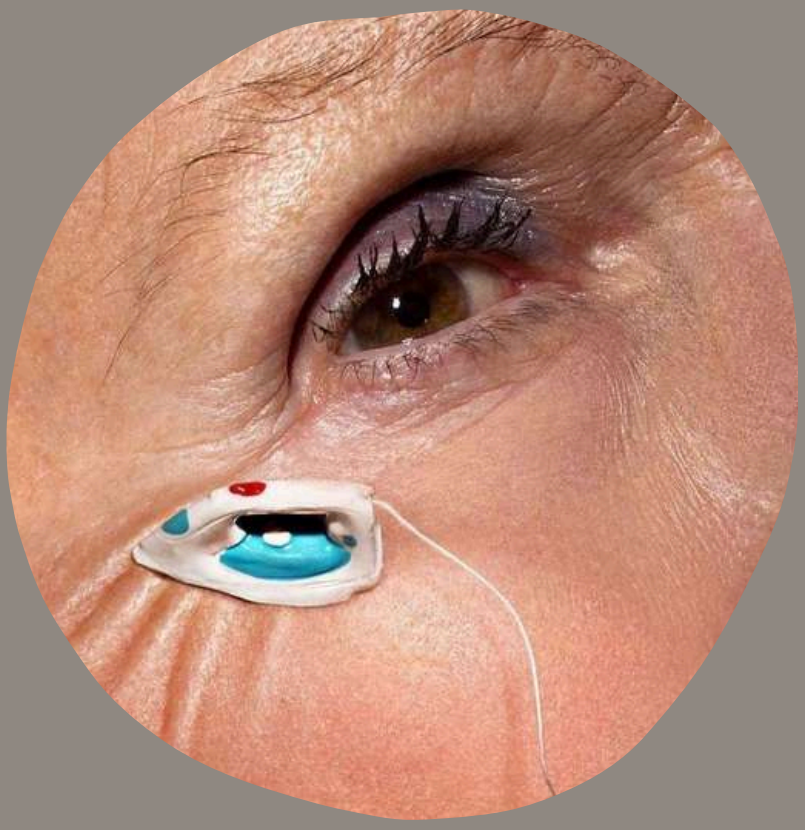

There's a common misconception that injectables are only for "after"—after the lines show up, after the skin starts to sag, after everything shifts and we try to rewind the clock. But at CURE, we don't wait for the damage. We plan for it.

PRE-JUV.

Preventative rejuvenation is the smarter way to age. It's subtle, it's strategic, and when done right, it keeps your features looking refreshed—not frozen. Think of it as skin-saving maintenance: just enough support, placed precisely where your face starts to lose collagen, elasticity, or volume before it visibly breaks down.

A touch of Botox in your 20s or 30s? That's not jumping the gun—it's protecting your expression from repetitive creases that will eventually etch themselves in. Filler along the cheekbone? That's not "too soon." It's support. Structure. Longevity.

The truth is, filler isn't just for fixing. It's for future-proofing.

And when you choose the right injector, you won't look "done"—you'll just look like you're aging better than anyone around you. Which is kind of the point.

So don't wait for the before-and-after moment. Be the no one can tell what you did, but everyone notices moment.

Body Treatments that Actually Work

(AND WHAT'S A WASTE)

Let's stop wasting time—and money—on trends that don't pull their weight.

The aesthetic industry loves to promise "snatched" with zero effort. But here's the reality: most body treatments are only as effective as the plan behind them. At CURE, we don't sell fads—we offer strategy.

EmsculptNEO? It works—when used correctly. It builds muscle tone and firms the area, especially the abs and glutes, but only with the right frequency and when paired with a smart lifestyle. You still have to show up for yourself.

Skinvive™ and Radiesse can be game-changers for crepey skin and loss of volume on the body—especially in areas like the arms, chest, and knees. These aren't fillers for the sake of filling. They're collagen stimulators that tell your skin to behave younger.

PDO Threads? Underrated for the body. Threads can lift and tighten skin on areas like the knees, abdomen, arms, and even above the knees—without surgery. It's ideal for clients not ready for a lift but ready to do something.

Lutronic ECO2 Laser? A powerhouse. If you're dealing with stretch marks, scars, or crepey skin texture, this fractional CO2 laser gets deep. Think collagen remodeling, skin resurfacing, and actual change—not just a temporary surface-level refresh.

What to skip? DIY fat-burning creams, sketchy machines, one-size-fits-all memberships promising miracles. If it doesn't have science or a track record, it doesn't belong here.

We'll always tell you what's worth it—and when to wait. Because smart body work isn't about chasing trends. It's about customizing the right plan for your goals.

RESULTS > *ROUTINE*

You don't need a complicated routine—you need one that works. At CURE, we're cutting through the noise and setting the record straight. Because when it comes to your skin, results should be the goal—not a shelf full of half-used bottles.

WHAT TO START (AND WHY)

We carry the best in clinical and corrective skincare—because what you use at home should support the work we do in treatment.

- SkinMedica brings pharmaceutical-grade ingredients and growth factors that regenerate and correct—from TNS® Advanced+ Serum to their Retinol Complex.
- Biologique Recherche is French skincare without the fluff. Cult-favorite Lotion P50 exfoliates, balances, and gets results. This line is for the disciplined skin care user who's ready to commit to change.
- Environ is your vitamin A powerhouse. Its step-up system helps re-educate skin gradually, making it a favorite for targeting texture, sun damage, and signs of aging.
- EltaMD is the SPF gold standard. Broad-spectrum, non-comedogenic, and trusted by dermatologists and injectors alike.

WHAT TO STOP (AND WHAT TO SWITCH)

Stop chasing trends and half-baked claims. That $140 moisturizer with no actives? It's not doing what you think. The "clean" cleanser that strips your skin barrier? Not helping.

Switch to products that deliver clinical results and complement your in-clinic treatments. A smart home routine can extend the life of your injectables, boost your laser results, and prevent the need for more aggressive correction down the road.

Let us help you edit your shelf and build a plan that supports your skin—and your strategy.

Because here, results > routine. Always.
